OBJECTIVE

An Information Systems student at Bina Nusantara University bridging business requirements with tech implementation. Passionate about end-to-end digital product development, combining business process modeling (BPMN), UI/UX prototyping, and low-code/automation tools to build user-centered solutions. Seeking an internship opportunity as a **Business Analyst**, **System Analyst**, or **UI/UX Designer** to deliver impactful digital experiences in a collaborative environment.

EDUCATION HISTORY

Bina Nusantara University **2024 - Present**

Information Systems - 5th Semester Student (Current GPA : 3.63/4.00).

- Academic Focus: Business Analysis, System Analysis, UI/UX Designer, and IT Project Management.
- Applied end-to-end product development concepts through coursework, combining business requirement analysis, user research & UI/UX prototyping, and Agile project management.
- Successfully led and completed 10+ academic projects, acting across roles in business analysis, system analysis, UI/UX Design and project coordination.

ACHIEVEMENTS

Finalist – Board Game Competition 2025 **March 2025 - June 2025**

BINUS University

- Led brainstorming and ideation sessions to generate innovative game mechanics and user-centered concepts.
- Designed and produced visual assets, prototypes, and final printed materials for board game execution.
- Implemented and showcased the game through exhibitions and live playtesting with judges and peers.

SKILLS

Languages: Indonesian (Native), English (Professional Working), Mandarin (Beginner)

Hard Skills:

- Business & System Analysis: Requirement Gathering, Business Process Modeling (BPMN), System Workflow Mapping,ERD & Data Dictionary, SmartPLS Data Analysis.
- UI/UX & Visual Design: User Research, Wireframing, High-Fidelity Interactive Prototyping (Figma), Design Systems.
- Automation & Low-Code: Robotic Process Automation (UiPath Studio), Low-Code Development (Mendix), Camunda Modeler.
- Web & System Development: Python, React.js, Vite, Node.js, SQL Fundamentals, Oracle APEX, IoT Architecture (MQTT & Sensor Simulation).
- Tools & Software: Git/GitHub, Draw.io, VS Code, CapCut, OBS Studio.

Soft Skills:

- Analytical Problem-Solving: Translating complex business challenges and user needs into clear technical specifications.
- Cross-Functional Collaboration: Communicating effectively between business stakeholders, design teams, and developers.
- Strategic Problem-Solving: Applying user-centric and analytical approaches to resolve complex challenges.
- Project Coordination: Managing project scopes, documentation, and task schedules under tight deadlines.
- Adaptability & Continuous Learning: Quickly mastering new tools, frameworks, and low-code technologies.
